Bears look cute, but they are sometimes dangerous to us. They are big, and they can run as fast as a car. They have sharp *claws to climb up trees. They sometimes attack people with their claws.

When you go to the mountains, be careful about bears. Bears don't like the sound we make, so walking with a bell is a good way to stay away from bears. If you unluckily meet a bear, keep watching its eyes and walk back slowly from it. Don't run away or cry out. The bear may be surprised and attack you.

People meet bears in the mountains and some of them are attacked by bears more often than before. People cut down forests to build their houses and make fields. It's becoming difficult for bears to get food from trees. Also, hiking has become popular among people. The mountains are originally the place bears and other animals live in. We should keep it in mind when we go into the mountains.
